WORK EXPERIENCE

SEP 2019

Web Developer . 2 mos

mapno . Iran. Hamadan . hamedan

JUL 2019

I have had a honer to be the part of the internship which was held by Mapno Co.

Mapno employing process started by an interview in-order to hire new employees for their web developers system.

Throughout the internship, I have learned about front-end & back-end parts with PHP web programming language.

They had their own personal MVC software architecture and by doing so they didn't use a framework.

And I like the smallest part of this group had the honer to learn on how to creat and handle a new project from beginning till the end.

EDUCATION

Hamedan University of Technology Bachelor(BSc/BA) -Engineering (Computer) 2018 - computer engineering

TECHNOLOGY SKILLS

| | | |

COMMENT

For language: By some personal home education, I have learned how to understand and speak on basic topics/ my field of work.

But in front of a native or advanced English speaker I might some times don't understand the full conversation.
